

## REMARKS

In response to the Notice to Comply dated January 12, 2007, Applicants found that SEQ ID NOS: 54-106 were mislabeled as SEQ ID NOS: 61-113 in the application as filed.

Applicants have amended the specification and the claims to correct these typographic errors. A new Figure 30 is enclosed to correct the same mislabeling errors. In addition, a substitute sequence listing is submitted to correct the inadvertent inclusion of two extra nucleotides (-gc-) at the 3' end in SEQ ID NOS: 70-84, support for which is found in their corresponding peptide sequences. As no new matter is introduced, entry of the amendments at this time is respectfully requested.

Respectfully submitted,

Date

4/20/07
